

AOTrauma Europe Masters Courses

Meet the Experts at your doorstep **2019**

Bristol, UK—June 17–18, 2019

Managing Pediatric Musculoskeletal Injuries (Course with Anatomical Specimen Dissection)

In this two-day course the participants will profit from interactive discussion with leading experts to develop a consensus view on the management of children's fractures and orthopedic emergencies. The course is delivered using a combination of small group discussions, cases, anatomical specimen simulations, and summary lectures. All activities are moderated by expert faculty in a highly interactive learning environment. Participants are encouraged to discuss the cases and content in an open manner and to share their own experiences.

Goals of the course

The AOTrauma Europe Masters Courses 2019 address current concepts and state-of-the-art treatment options in orthopedic trauma. Each course covers one or more topics and has been planned based on the common and critical patient problems related to the specific topic.

Target participants

The course is aimed at surgeons who have been practicing orthopedic trauma for many years and who are willing to share their experiences on the specific topic of the course.

Participants should have completed the AOTrauma Courses—Basic Principles and Advanced Principles of Fracture Management and must be able to communicate well in English.

Course description

The course is delivered using a combination of small group discussions, cases, exercises with anatomical specimens, and summary lectures. All activities are moderated by expert faculty in a highly interactive learning environment. Participants are encouraged to discuss the cases and content in an open manner and to share their own experiences.

Learning objectives

At the end of the course, participants should be able to:

- Perform different surgical approaches around the pediatric hip
- Define an appropriate treatment plan in open pediatric fractures
- Recognize controversies in the management of pediatric tibial shaft fractures
- Define the current concepts in the management of osteoarticular infections
- Formulate strategies for managing complications in pediatric trauma

Course fee

The course fee is EUR 1600.00 and includes all course material, lunches, coffee breaks and course dinner.
